BATTLE OF THE BANDS

Objectives and Process

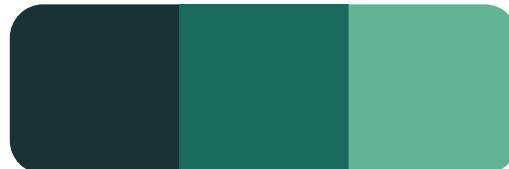

A senior capstone design project, I chose to develop a site for a Battle of the Bands music festival that would take place in Mesa, AZ. I prototyped and coded three responsive pages for this site.

I developed a general structure for the pages by sketching them out and designing wireframes in Figma, and developing a color and font system meant to reflect a punk, rock and roll tone. After taking feedback on the initial designs I developed prototypes that I then developed into an html5 website that displays info about the festival.

ShediFy App UI

Roboto Bold
Roboto

Objectives and Process

This project was developed for a Motion Graphics class with the objective of creating an animated mock-up design for a mobile application. For this project I used Adobe Photoshop and After Effects in order to design and animate the graphics. The application envisioned for this project was 'Shedify' an app for the purchase and rental of sheds by the user, which was inspired by applications such as AirBnB and Zillow.

Mobile

Objectives and Process

This project aimed to bring a workable redesign of the Salt River Tubing homepage, which had been broken and mostly empty for several years. I wanted to make a mockup showing how the site could be reworked using both existing assets and a new color scheme for desktop, tablet, and mobile viewing. I used Photoshop and Figma to edit assets and develop mockups for each viewport size.

About Portfolio Contact

Hello!

My name is Ethan Summers, I'm 22 years old, and I live to be able to create and learn new things. I grew up using computers and consuming the internet culture of the 2000's and coming to love the internet as a platform for creativity. I ended up pursuing the Graphic Information Technology program at ASU to develop a path to making a passion for tech and design a career. Building my experience in HTML5 web development and tools from across the Creative Cloud Suite, I look forward to creating engaging platforms for the web. You can currently find me studying and working as a Community Assistant at ASU's Polytechnic Campus.

What I Deliver

Design

I have experience planning and designing a variety of media and UI experiences using tools like Figma, Photoshop, After Effects, and more.

Development

I also am proficient in the usage of HTML5 and CSS to craft engaging webpages. I also bring interactivity to pages with Javascript with React and jQuery.

Collaboration

With 4 years of experience in the GIT program at ASU, along with working for ASU housing, I have experience collaborating to tackle problems as a team.

I ended up pursuing the Graphic Information Technology program at ASU to develop a path to making a passion for tech and design a career. Building my experience in HTML5 web development and tools from across the Creative Cloud Suite, I look forward to creating engaging platforms for the web. You can currently find me studying and working as a Community Assistant at ASU's Polytechnic Campus.

What I Deliver

Design

I have experience planning and designing a variety of media and UI experiences using tools like Figma, Photoshop, After Effects, and more.

Objectives and Process

This project was to develop a unique and distinctive brand identity for me as a professional designer. Starting from a personal moodboard I identified colors and fonts to match my theme, as well as a personal mission and adapted those into a series of elements that I can use on my website, resume, social media pages, and more.
