Northwestern Women's Ice Hockey

Objectives and Process

This project was a series of posts designed for Northwestern University's Womens' Hockey Team. I was recruited to design a variety of posts formatted for Instagram to advertise games and recruitment for their 2025-2026 season. I incorporated photos taken by the team's media lead while utilizing Northwestern's branding and color scheme to develop eye catching posts. This was a new challenge for me as I had limited experience designing for social media based outreach.

WEEKEND SCHEDULE NORTH SHORE CLASSIC 2025

HOSTED BY NORTHWESTERN AND LOYOLA-CHICAGO

SUNDAY, JAN 12TH
NILES OUTDOORS | 9:00AM

INDIANA

VS

GRAND CANYON

NILES OUTDOORS | 11:20AM

NILES OUTDOORS | 1:40PM

CENTRAL MICHIGAN

VS

LOYOLA-CHICAGO

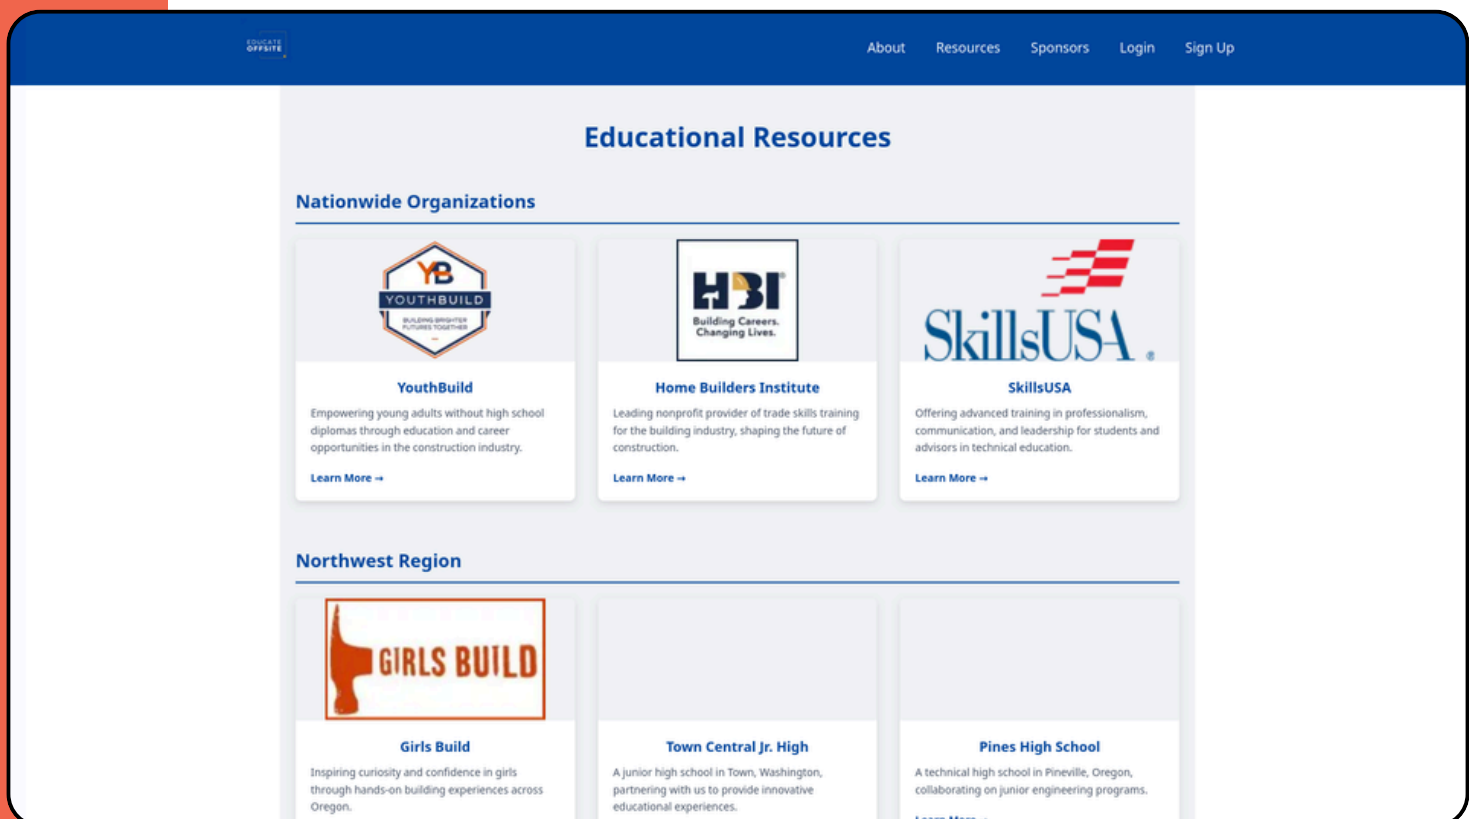

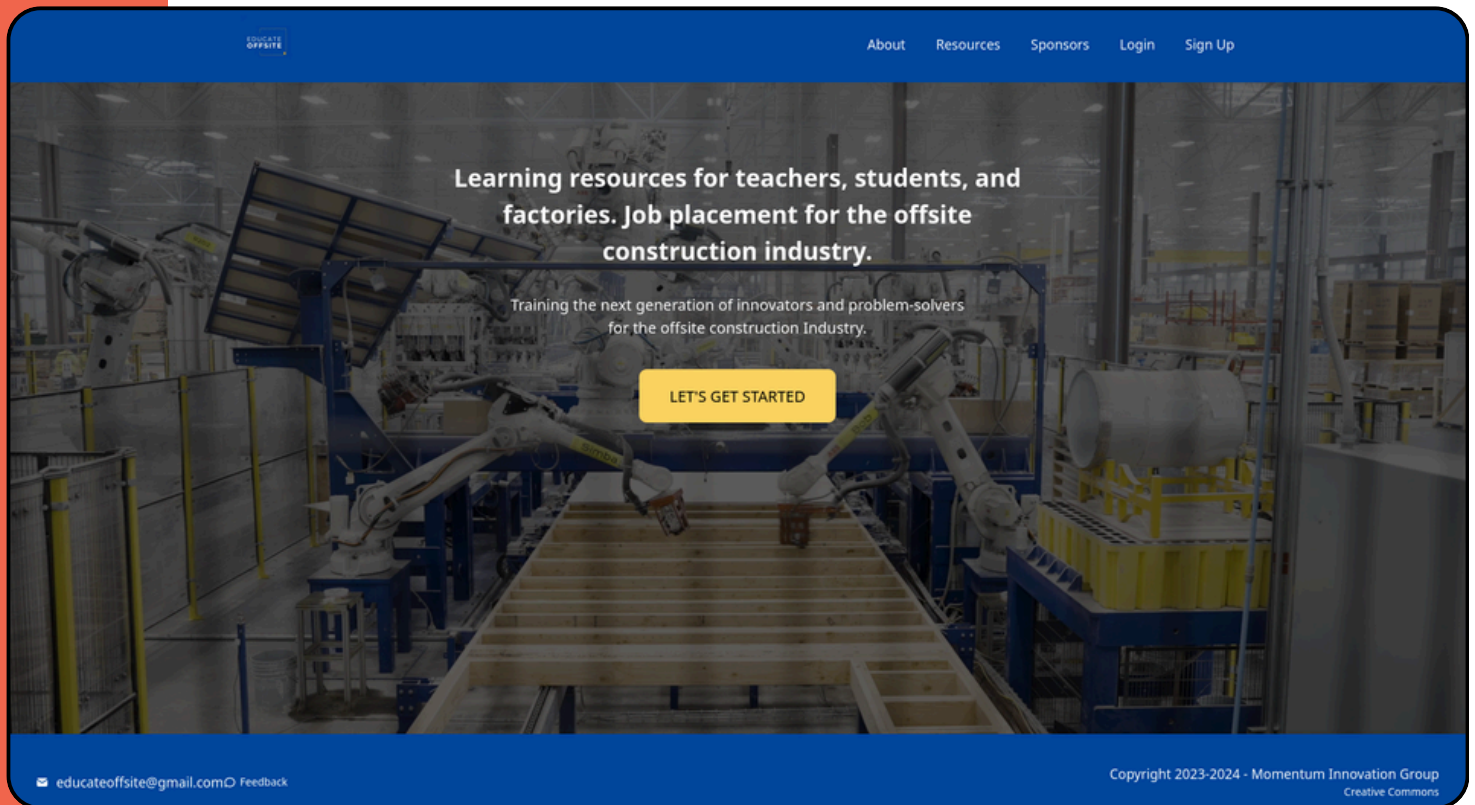

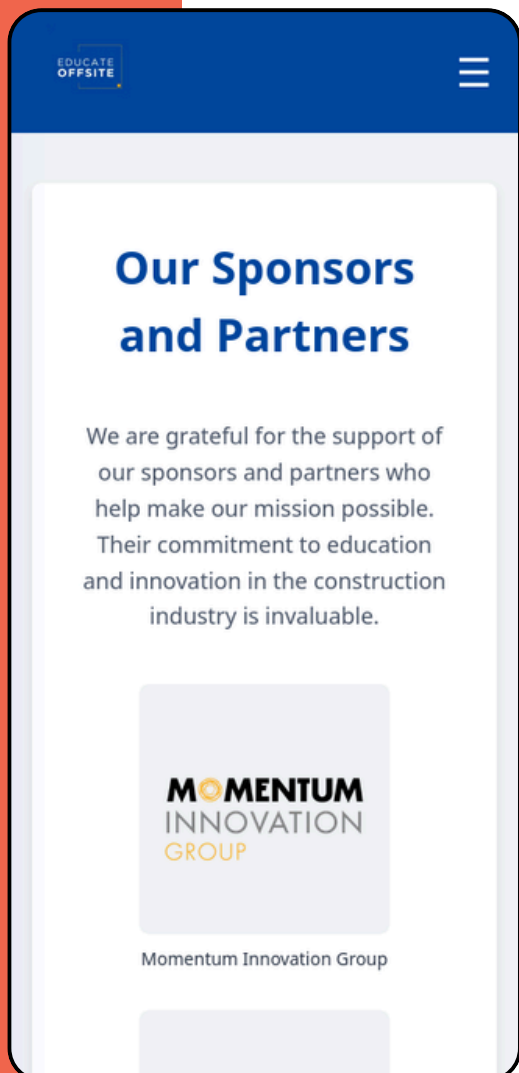

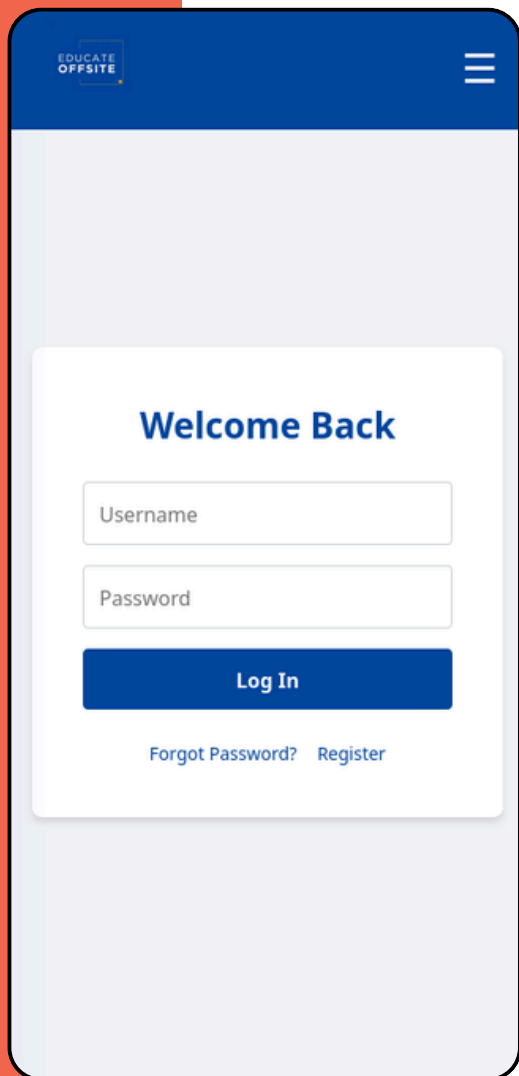

N
**NORTHWESTERN
ICE HOCKEY**

VS. WISCONSIN
Oct. 18th at 8:40 PM

\$5 or FREE with wildcard

Educate Offsite - Educational Webpage

Objectives and Process

I worked with Momentum Innovation on developing their Educate Offsite platform. This is an online trade skills/education website funded by the U.S. Department of Energy Building Technologies Office. I worked closely with their communications director and web developer to design a web site front-end for both mobile and desktop platforms. We started from a flow chart of mock-ups for the pages the director was looking for, developing a smooth navigation experience for users. This project allowed me to further develop my experience with React development as well as deployment of web pages with AWS.

Salt River Tubing - Site Concept

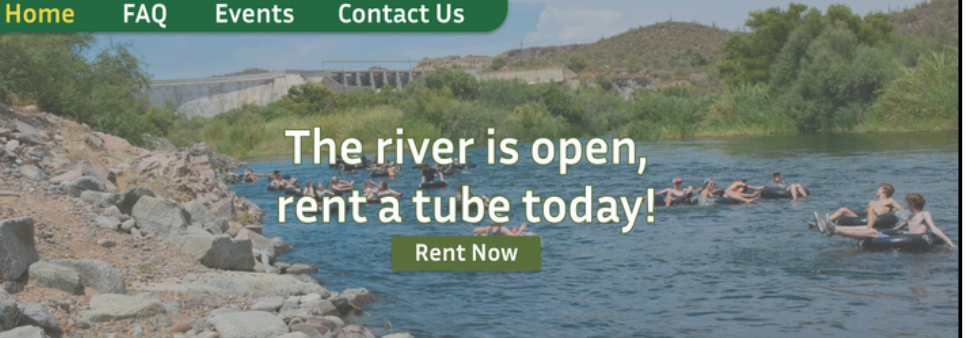

Old and New Desktop Concept

**Salt River Tubing**
Operating in Tonto National Forest

Open Everyday
9 AM - 6:30 PM

Tablet Viewport

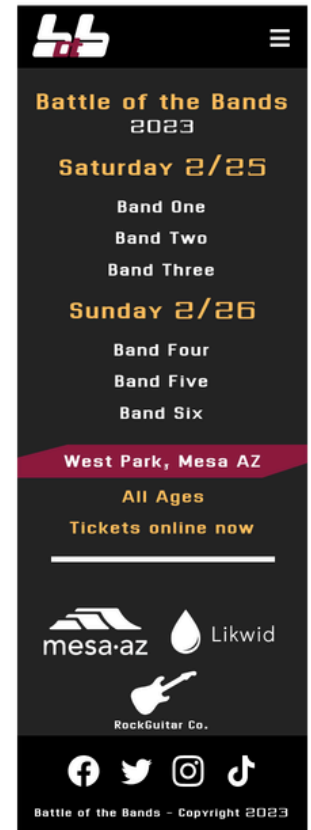

Mobile Viewport

Objectives and Process

This project aimed to bring a workable redesign of the Salt River Tubing homepage, which had been broken and mostly empty for several years. I wanted to make a mockup showing how the site could be reworked using both existing assets and a new color scheme for desktop, tablet, and mobile viewing. I used Photoshop and Figma to edit assets and develop mockups for each viewport size.

Battle of the Bands - Project Mock-Up

Objectives and Process

A senior capstone design project, I chose to develop a site for a fictional Battle of the Bands music festival that would take place in Mesa, AZ. I prototyped and coded three responsive pages for this site. I developed a general structure for the pages by designing wireframes in Figma, and developing a color and font system meant to reflect a punk, rock and roll tone. After taking feedback on the initial designs I developed prototypes that I then developed into an html5 website that displays info about the festival.

Zise Chocolate - Landing Page

Objectives and Process

I was enlisted in this project to make a simple landing page in Wordpress for Zise Chocolate, a home-based artisanal chocolate business specializing in tastings. I

chose an earthy, chocolatey palette for the site to match the energy of the brand. I also worked with Diane to edit an about section and link a menu with her various offerings and services.
